Commitment

Ratti S.p.A. Società Benefit has joined 4sustainability® Chemical Management Protocol that has the elimination of the substances contained in the ZDHC Manufacturing Restricted Substances List as a goal (<https://mrsl.roadmaptozero.com/>).

To this end, **the intentional use** of the substances listed in the ZDHC MRSL potentially present in chemical products, it must be eliminated from any stage of the production process.

According to 4sustainability® Chemical Management Protocol, suppliers belonging to your category are required to:

- verify that all products supplied to us comply with the limits indicated in *PRSL Ratti* and monitor the compliance over time;
- verify, if applicable, that all the manufacturing processes conducted internally and/or externally, applied on our products, comply at least with ZDHC MRSL limits (Manufacturing Restricted Substances List). At the link below you can see in detail the last version in force of ZDHC MRSL with related descriptions: <https://mrsl.roadmaptozero.com/> . To these limits we decided to add further limitations specifically related to PFC presence, indicated inside the attached Addendum to ZDHC MRSL;
- within 30 days fill in the 4s Assessment CHEM 4.0 accessible at the following link: platform.4sustainability.it/Assessments/ASSESSMENT_4SUSTAINABILITY_CHEM_2021_ENG

This assessment allows to gather the most important KPI needed to measure the supply chain performance on Chemical Management and allow you to send the information to all the 4s companies you work with **without compiling it more than once**.

- **sign up to ZDHC Academy FOR FREE** (<https://academy.roadmaptozero.com/>): inside the Academy you can find training sessions on Chemical Management worldwide and further online training videos.
